SKILLS

1.Frontend:

- JavaScript,
- HTML&CSS,
- TailwindCSS,
- Bootstrap,
- React.js,
- React Native

2. Backend:

- Node.js,
- Express,
- Python,
- Java,
- Kotlin

3. Databases:

- MongoDB,
- Firebase,
- Appwrite,
- Supabase

4. Tools & Platforms:

- Android Studio,
- Figma

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with over 5 years of experience in building scalable mobile and web applications using the MERN stack (MongoDB, Express, React, Node.js) and React Native. Proficient in developing cross-platform mobile apps for iOS and Android, as well as robust web applications, with expertise in Firebase, Appwrite, Supabase, and MongoDB for database management. Demonstrated success in delivering high-impact projects, including a match-making app (Cudship) and a health-tech app (EthiopeaZHealth), with a focus on scalability, security, and user experience. Strong leadership and mentorship skills, having managed teams and taught web development to students. Adept at solving complex technical challenges and collaborating effectively in diverse teams.

WORK EXPERIENCE

Buzzy.ng (Remote)
Full-Stack Developer
November 2024 – June 2025

- Developed a multipurpose fintech mobile app (available on Play Store and Apple Store) by implementing complex Figma designs, overcoming illogical design challenges through meticulous coding and optimisation.
- Built and optimised backend with MongoDB, ensuring scalability for e-commerce and voting system features, enhancing user experience by reducing image loading times using advanced optimisation tools.
- Enhanced app security by implementing PIN and biometric verification, along with email OTP confirmation for fund withdrawals, significantly reducing fraud risks.
- Introduced video support for e-commerce advertisements, allowing users to showcase products with both images and videos, improving user engagement.
- Collaborated with a team of 10 developers, navigating a complex software architecture without initial guidance, demonstrating strong adaptability and problem-solving skills.

Bemsgroup (BemsSoft Department)
Web Developer / Software Manager
March 2023 – September 2023

- Designed and developed bemsinstitute.com, a website for enrolling students into tech and vocational skills programs, streamlining the registration process for the company.
- Taught web development fundamentals (HTML, CSS, JavaScript) to 21 students over 3 months, fostering their growth in tech skills and

preparing them for real-world projects.

- Managed a team of 5 developers as Software Manager, overseeing project planning, aligning Figma designs with software goals, and ensuring timely delivery of milestones.
- Led event planning for tech workshops, enhancing the company's outreach and student engagement.

Contract Full-Stack Developer

Cudship (Match-Making Social Media Mobile App)
Ongoing (Currently in Testing Phase)

- Built a scalable match-making app using React Native and Firebase, designed to handle over 1 million users by implementing pagination, optimized Firestore queries, cloud functions, and caching.
- Developed a live location mapping feature to show users' real-time locations on a map, along with a nearby users feature, tackling complex geolocation calculations for accuracy.
- Designed a robust match-making algorithm and implemented secure user verification using Google accounts and email/password authentication.
- Addressed scalability challenges through efficient database design and performance optimization, ensuring seamless user experiences.

Contract Full-Stack Developer

EthiopeAZHealth (Health-Tech Mobile App)
Completed (Not Yet Launched)

- Developed a health-tech app for patient-doctor connectivity using React Native, featuring community live chats, consultations, and reminders/notifications for medication, exercise, and appointments.
- Implemented a paid VIP chat feature ($4/month subscription), enabling private consultations with doctors, with potential to generate thousands in annual revenue.
- Built a dual-sided platform (Doctors and Patients), including features like doctor alerts for new VIP patients and community chat groups for patients with similar illnesses.
- Ensured reliable real-time data syncing for live chats and push notifications, delivering a seamless experience for future millions of users worldwide.

Additional Projects

- Banking Website: Designed and developed a fully functional banking website using React.js, featuring secure user authentication, transaction history, and call-to-action elements to enhance user engagement.
- Landing Pages: Created multiple high-converting landing pages with React.js, incorporating modern UI/UX principles to drive user interaction and conversions.

LANGUAGES

- English (Fluent)
- Igbo (native)
